

BASTIEN LADRA

DEVSECOPS & CYBERSECURITY ENGINEER

ladra.bastien@gmail.com | LinkedIn | GitHub | France | Remote / on-site

Cybersecurity engineer focused on DevSecOps, secure CI/CD, software supply chains, GCP/AWS cloud security and automation. Professional experience at NEHS Digital, GSOI and ASTEK, complemented in 2026 by delivery pipelines with quality gates, SBOMs, provenance, signatures, DAST and secure IaC.

2026 ENGINEERING EVIDENCE

7.2/10 OpenSSF Scorecard from 3.9/10	3 professional roles NEHS · GSOI · ASTEK	7 security workflows Secure API DevSecOps	300 h POEI DevSecOps Aug - Oct 2026
---	---	--	--

SELECTED PROJECTS

Secure Software Supply Chain Lab - LUISE / POEI | 2026

- Multi-job CI with Gitleaks, Ruff, Bandit, Pytest, pip-audit, CodeQL and a blocking quality gate before build.
- CycloneDX SBOM, provenance, Cosign keyless OCI signing, GHCR and verification before deployment.
- OpenSSF Scorecard improved from 3.9 to 7.2/10; release v0.1.18 showed 0 observed vulnerabilities in Orteliu after the pip lock fix.

Secure API DevSecOps - Public project | 2026

- End-to-end secured FastAPI delivery path covering SAST, dependencies, containers, OWASP ZAP DAST, IaC and Cloud Run.
- SBOMs, attestations, hash-locked dependencies, digest pinning and controlled negative tests for CI safeguards.

PROFESSIONAL EXPERIENCE

2023 - 2024	DevSecOps - NEHS / DRIM-M - Bitbucket → GitLab migration, CI/CD workflows, incidents and GitLab optimization.
2022 - 2023	Information Systems Security Operations - GSOI - Security Command Center, GCP, Cloud Armor, firewall, bastion, PKI, Terraform / Ansible.
2022	Watcher SecOps - ASTEK - Vulnerability monitoring platform, Vuls/Trivy, Python/API/UI, Docker/AWS.

ACADEMIC PROJECT · EPITECH CURRICULUM

2019 - 2022	Project Lead / Developer - Epitech EIP - Curriculum project: eight-person team, web/mobile development, DevOps operations and containerization.
